DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 7 recites the limitation "the dosing means" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Clarification of the above noted observation is requested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Scogin.

The temporary storage and high storage vessel are readable on elements 20 and 22 and the filling station is readable on elements 16, 18, 20 and 22. Element 16 is readable on the compressor. The vehicle tank is readable on the engine 12 for holding or receiving the compressed fuel or natural gas (CNG). Note that other types of fuels could be utilized that has a certain level of hydrocarbon content such as gasoline and diesel fuels, which inherently have hydrocarbon contents (see

Art Unit: 3753

column 7, lines 24-28). The doses of oil added to the fuel or natural gas is readable on the engine oil through oil line 50 and lube pump 52. The limitation of claim 5 is inherent in view of the teaching of the CNG and the oil through elements 50 and 52. See column 6, lines 40-46 for the teaching of a mineral oil.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Scogin in view of Kray. The above claim is readable on the patent to Scogin with the single exception of utilizing an oil additive for a fuel, such as, synthetic oil. The patent to Kray teaches the above exception. In view of the teaching of Kray it would be obvious to substitute a synthetic oil for the mineral oil of Scogin as taught by column 8, lines 33-47, if desired. Such a modification provides no unobvious or unexpected result.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
